

Help Orange County Shape Our Urban Tree Canopy

Trees improve air quality, provide shade, decrease erosion, and remove pollutants from stormwater.

The Florida Forestry Service is studying unincorporated Orange County to see if we can use more trees to help us reduce flooding and improve water quality in our lakes, ponds, springs, and rivers.

Your opinions and ideas are needed. We hope you will come share them at this meeting!

Trees and Stormwater Study | Community Meeting

Tuesday | June 13 | 5:30 to 7:00 pm

Orange County Administration | Commission Chambers

201 South Rosalind Avenue | Orlando | 32801

Focus is on urban trees in unincorporated Orange County

All residents can attend and offer input
